***Allowable Subject Matter***

1. After a further search and a thorough examination of the present application and in light of the Applicant's arguments and in light of the prior art made of record, claims 5-7, and 12-19 are found to be in condition for allowance.

***Reasons for Allowance***

2. The following is an Examiner's statement of reasons for the indication of allowable subject matter:

The claims are allowable over the prior art of record since the cited reference taken individually or in combination fails to particularly disclose a real-time stereo matching system comprising first and second cameras having respective parallel optical axes and co-planar focal planes, and a clock control means for outputting a first clock signal provided to even-numbered processors of a processing means and to a second storage means, and a second clock signal provided to odd-numbered processors of the processing means and a first storage means, to control operation of the first and second storage means and the processing means.

It is noted that the closest prior art of record (Cox US Patent no. 5383013) teaches a similar real-time stereo matching system comprising first and second cameras, however, Cox fails to particularly teach or suggest "*first and second cameras having respective parallel optical axes and co-planar focal planes, a clock control*

*means for outputting a first clock signal provided to even-numbered processors of a processing means and to a second storage means, and a second clock signal provided to odd-numbered processors of the processing means and a first storage means, to control operation of the first and second storage means and the processing means" as specified in the claims.*

### **Conclusion**

Any comments considered necessary by applicant must be submitted no later than the payment of issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled "Comments on Statement of Reasons for Allowance".
